```bash
#!/bin/bash

#Inside /sys/class/leds directory, you have the following directories
#fxi-ccandy:blue:
#fxi-ccandy:green:net
#fxi-ccandy:green:power
#fxi-ccandy:orange:net
#fxi-ccandy:red:

#Each of these directories have a brightness file, set it to 0 to turn that
#led color off.  In other words, to turn off the blue led, enter the following:
#    echo 0 > /sys/class/leds/fxi-ccandy\:blue\:/brightness
#Change the 0 in the previous command to number greater than 0 to turn it on.

#Shut off all leds
echo 0 > /sys/class/leds/fxi-ccandy\:blue\:/brightness
echo 0 > /sys/class/leds/fxi-ccandy\:green\:net/brightness
echo 0 > /sys/class/leds/fxi-ccandy\:green\:power/brightness
echo 0 > /sys/class/leds/fxi-ccandy\:orange\:net/brightness
echo 0 > /sys/class/leds/fxi-ccandy\:red\:/brightness
```
